Performance

Metrics

First Contentful Paint	0.7 s	Time to Interactive	1.5 s
Speed Index	0.9 s	Total Blocking Time	0 ms
Largest Contentful Paint	0.9 s	Cumulative Layout Shift	0

Values are estimated and may vary. The [performance score is calculated](#) directly from these metrics. [See calculator.](#)

[View Original Trace](#)

Opportunities — These suggestions can help your page load faster. They don't [directly affect](#) the Performance score.

Opportunity	Estimated Savings
Remove unused JavaScript	0.4 s
Use HTTP/2	0.16 s
▲ Reduce initial server response time	0.03 s

Diagnostics — More information about the performance of your application. These numbers don't [directly affect](#) the Performance score.

▲ Image elements do not have explicit width and height	▼
User Timing marks and measures — 4 user timings	▼
Keep request counts low and transfer sizes small — 36 requests • 1,072 KiB	▼
Largest Contentful Paint element — 1 element found	▼

Avoid long main-thread tasks — 3 long tasks found

Passed audits (27)

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

Progressive Web App

These checks validate the aspects of a Progressive Web App. [Learn more.](#)

Fast and reliable

Page load is fast enough on mobile networks ▼Current page responds with a 200 when offline ▼

▲ `start_url` does not respond with a 200 when offline **The `start_url` did respond, but not via a service worker.** ▼

Installable

Uses HTTPS ▼Registers a service worker that controls page and `start_url` ▼Web app manifest meets the installability requirements ▼

PWA Optimized

▲ Does not redirect HTTP traffic to HTTPS ▼

Configured for a custom splash screen ▼Sets a theme color for the address bar. ▼Content is sized correctly for the viewport ▼Has a `<meta name="viewport">` tag with `width` or `initial-scale` ▼Contains some content when JavaScript is not available ▼Provides a valid `apple-touch-icon` ▼

▲ Manifest doesn't have a maskable icon ▼

Additional items to manually check (3) — These checks are required by the baseline [PWA Checklist](#) but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually. ▼
