## Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover. Learn more in our guide on <u>conducting an accessibility review</u>.

# Progressive Web App

These checks validate the aspects of a Progressive Web App. Learn more.

#### Fast and reliable

	Page load is fast enough on mobile networks	~
	Current page responds with a 200 when offline	~
<b>A</b>	start_url does not respond with a 200 when offline The start_url did respond, but not via a service worker.	~
	Installable	
<b>A</b>	Does not use HTTPS — 1 insecure request found	~
	Registers a service worker that controls page and start_url	~
	Web app manifest meets the installability requirements	~
	PWA Optimized	
	Does not redirect HTTP traffic to HTTPS	~
	Configured for a custom splash screen	~
	Sets a theme color for the address bar.	~
	Content is sized correctly for the viewport	~
	Has a <meta name="viewport"/> tag with width or initial-scale	~
	Contains some content when JavaScript is not available	~
	Provides a valid apple-touch-icon	~
	Manifest doesn't have a maskable icon	~

Additional items to manually check (3) — These checks are required by the baseline <u>PWA Checklist</u> but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
